

Question: How do I print my digital yoga cards back to back with the matching cards (ex. breath + instructions or pose + keyword)?

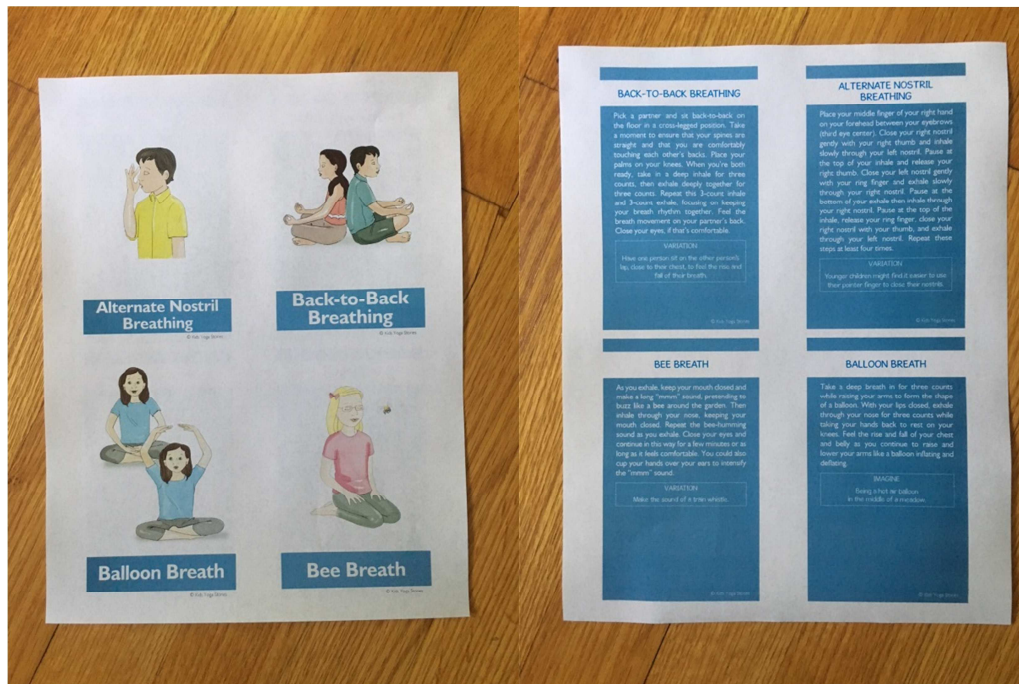

Step One:

When you click on the “Printer” option, choose these properties:

- Choose “2” by “2” pages per sheet to print 4 per page
- Print on both sides of the paper
- Choose the pages to print by first selecting the even numbers of the pose cards (or breathing exercises), and then the odd numbers of the keyword cards (or instructions). **Note** that you’ll need to match up the correct order of the odd/even cards. See below: “6,8,10,12,9,7,11,13”

Step Two: Click on “Print” to get the double-sided pages (if your printer has this option).

Step Three: Cut the page into four to separate your four cards. Repeat the process with the rest of the deck.
